If jazz is your thing, but you're looking for something new, look no farther than New York's Soulive. Fresh from recent gigs opening for Dave Matthews, the band is re-releasing their debut disc on Velour to up distribution and give fans a taste of their sound before their upcoming Blue Note

release, Next. With two bonus tracks (both live), the Hammond B3 and horn arrangements of this organic three piece is sure to get you hoppin' with just a touch of funk, a bit of hip-hop and a whole hell of a lot of twisted jazz. For a look at these jazz entrepreneurs before they added guest vocalists like Talib Kweli, Black Thought (The Roots) and a slew of DJ tweekers, buy the album and let the sounds flow. — Marek
